## PROFESSIONAL SUMMARY

Final-year Computer Science student with experience building **ETL pipelines**, **Medallion architecture** data platforms, and cloud-native solutions using **Azure Data Factory**, **Databricks**, **PySpark**, and **SQL**. Skilled in **Azure Data Lake**, CI/CD deployment, and data warehousing. **IEEE Vibethon Winner (1st Place)**.

## SKILLS

|                                |                                                                                |
|--------------------------------|--------------------------------------------------------------------------------|
| <b>Data Engineering :</b>      | Azure Data Factory, Databricks, PySpark, Azure Data Lake, Databricks Notebooks |
| <b>Programming Languages :</b> | Python, SQL, Java                                                              |
| <b>Databases :</b>             | MySQL, MS SQL Server                                                           |
| <b>Tools :</b>                 | Git, GitHub, Azure DevOps, Logic Apps, VS Code, Claude AI                      |
| <b>Concepts :</b>              | ETL Pipelines, Medallion Architecture, Star Schema, Dimensional                |

## PROJECTS

### Azure Data Factory — Cloud Data Pipeline | GitHub Feb 2026 - Mar2026

- Developed **metadata-driven ETL pipelines** to ingest data from **4 source types** (Files, SQL, REST APIs, GitHub) into **Azure Data Lake**.
  - Built **parameterized ADF pipelines**, enabling **scalable** and **reusable** data ingestion workflows.
  - Automated deployment and monitoring using **Azure DevOps** and **Logic Apps**.
- Tech Stack: Azure Data Factory, Azure Data Lake, Self-hosted Integration Runtime, Logic App*

### Data Warehouse and Analytics Pipeline | GitHub Jan 2026 - Feb 2026

- Built a **Medallion ETL pipeline** on **Databricks** for data ingestion, cleansing, and reporting.
  - Designed a **Star Schema** with **4 dimension** tables and **2 fact views** for analytics reporting.
  - Implemented **6 validation checks** including deduplication and integrity validation to ensure **data quality**.
- Tech Stack: SQL, Python, Star Schema, Databricks, MS SQL Server*

### Personal Finance Analysis and Budget Optimisation System

- Developed an **end-to-end data pipeline** for transaction analysis across **five financial dimensions**.
  - Automated portfolio tracking using live **SIP** and **mutual fund APIs**.
  - Built **KPI dashboards** for **real-time financial insights** and budget monitoring.
- Tech Stack: Python, MySQL, REST APIs, Data Pipeline*

## EDUCATIONS

|                                                                                                                         |                    |
|-------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>New Horizon College of Engineering   Bengaluru</b><br><i>Bachelor of Engineering in Computer Science Engineering</i> | <b>2023 – 2027</b> |
| <b>Jaivins Academy</b><br><i>Higher Secondary Education (Class XI–XII)</i>                                              | <b>2021 – 2023</b> |

## CERTIFICATIONS

|                                                           |

| <b>Claude Code in Action</b><br><i>Anthropic Academy</i>  |

## AWARDS & ACHIEVEMENTS

- Won 1st Place at IEEE Vibethon among 30+ teams by leading a 4-member team to build a Student Carpool & Ride Subscription System.
